

Camera Instructions and Settings for Dissembler Camera System

In the Box:

- Dissembler camera housing: front and back cover
- Brickhouse (BHS), Camscura Pro Covert Camera (DVR) with User's Guide
- 128 GB micro SD card with adaptor (Formatted). See Resources to format additional cards not provided.
- 8000 Mah Battery
- (4) Screws for pole mounting
- Charger
- USB cord

Camera Set Up

Step 1:

Charge your camera with provided charger. Light will be orange until charged then light will turn green. Full charge can take up to twenty four (24) hours to complete.

Step 2:

On the back of the camera is a switch. The switch must be turned to the "gear" position to work properly in the housing.

Step 3:

Remove micro SD card from adaptor and place in appropriate slot in camera.

Step 4:

Using provided USB cord, plug camera into your computer. Install Brickhouse software located on the SD card inside your camera or click this link:

For Mac: [BHS Cam Setup Tool for Mac](#)

For Windows: [BHS Cam Setup Tool for Windows](#)

Step 5:

Run BHS software.

Below are the recommended default settings to use with the Dissembler. This allows up to 120 hours of total recording.

Important, the time and date on your computer must be synced with the camera otherwise the camera will default to an arbitrary date and time.

The screenshot displays the 'BHS Cam Setup Tool' window. At the top left is the BrickHouse Security logo with the tagline 'WHEN YOU NEED TO KNOW.' To the right of the logo, it shows 'Version 1.5.1' and the website 'http://www.brickhousesecurity.com'. Further right, it identifies the device as 'Model Black Box Pro HD' with 'Firmware Version 1.1.06'. The main interface features a left sidebar with three icons: a clock labeled 'Date Time', gears labeled 'Settings', and a checklist labeled 'Option'. The main content area is titled 'DVR Connected' and includes a 'Sync Date Time to DVR' button. It offers two selection options: 'PC Date Time' and 'Custom Date Time'. Under 'PC Date Time', the current date is '16 Jun, 2018' and the time is '13:57:12'. Under 'Custom Date Time', the date is set to '16 Jun, 2018' and the time is '13:54:24'. At the bottom, a 'DVR Date Time SnapShot' section shows the date '16 Jun, 2018' and time '13:54:34'.

Note: Vertical flip allows for proper orientation, otherwise your videos will be up-side-down.

Camera Instructions and Settings for Dissembler Camera System

Note: PIR-Trigger (Passive Infrared Sensor) is disabled due to distance limitations. Leaving it enabled can decrease battery life.

Note: Motion Trigger Sensitivity may be enabled but can be very sensitive. A leaf blowing by, rain, change in shadows by passing clouds can trigger a recording.

Scheduled Recording: Click Edit. To pick specific schedule times to record, left click and hold in the day/time you wish to start and drag the mouse to the time you wish to stop recording. A window will pop up after you have made your selection prompting options for types of recordings.

Deployment

Turn camera on:

To turn on the camera hold the button down until you see the green light come on. The green light will flash as it powers up. The light will turn off once the camera finishes booting up. This process can take up to 30 seconds. The camera is still on.

Place camera inside housing:

Align camera lens with hole in front cover of housing.

Step 4: Loosen Bottom Screw
to Remove Camera

Note: Do not use power drill to tighten screws against the Dissembler. Over-tightening can damage the cover.

Camera Instructions and Settings for Dissembler Camera System

Remove Camera:

Remove camera when surveillance is concluded or battery life is up, whichever is sooner. All Dissembler camera housings fit on the same screw template. For longer cases, cameras can easily be switched out for continued surveillance.

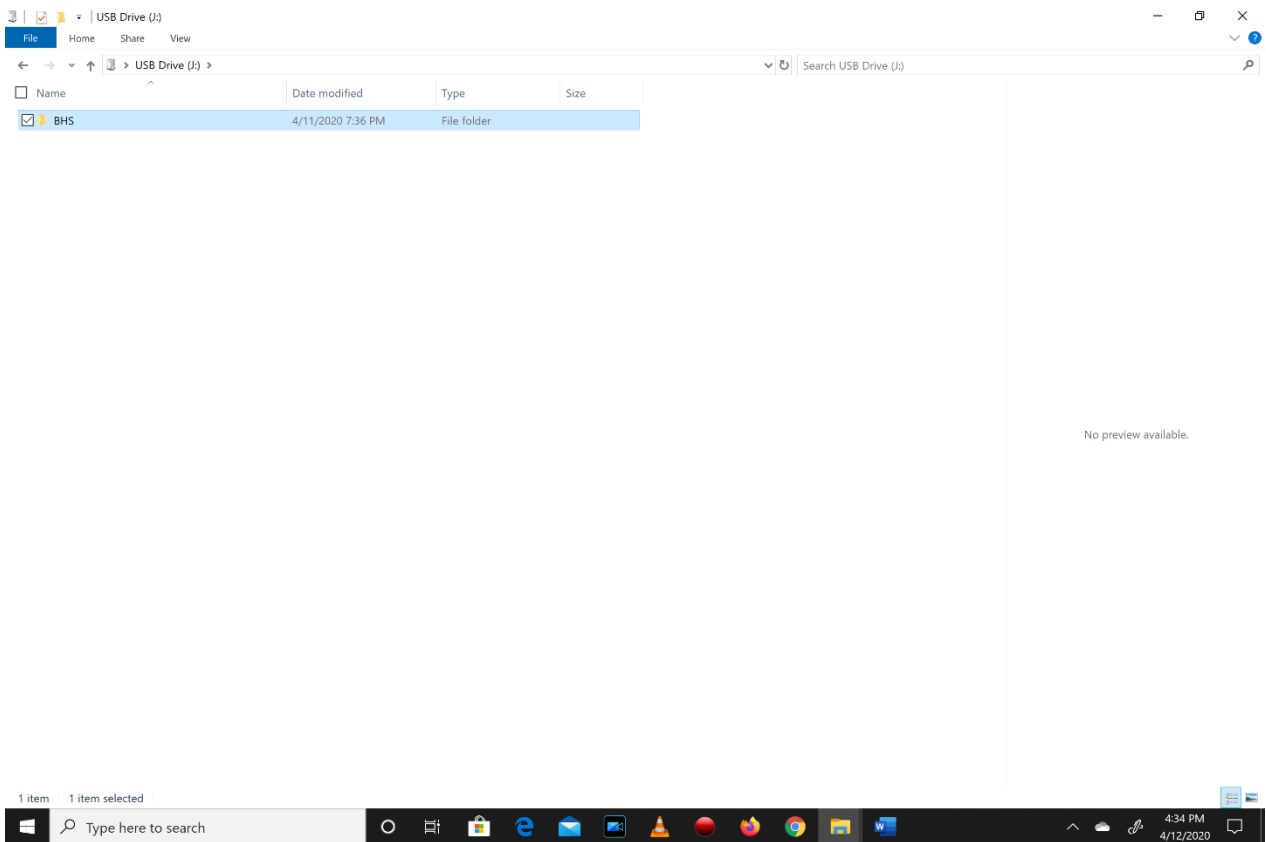

To open camera use a flat screw driver to pry off the rear cover using the provided slot in the rear cover.

Turn Camera Off:

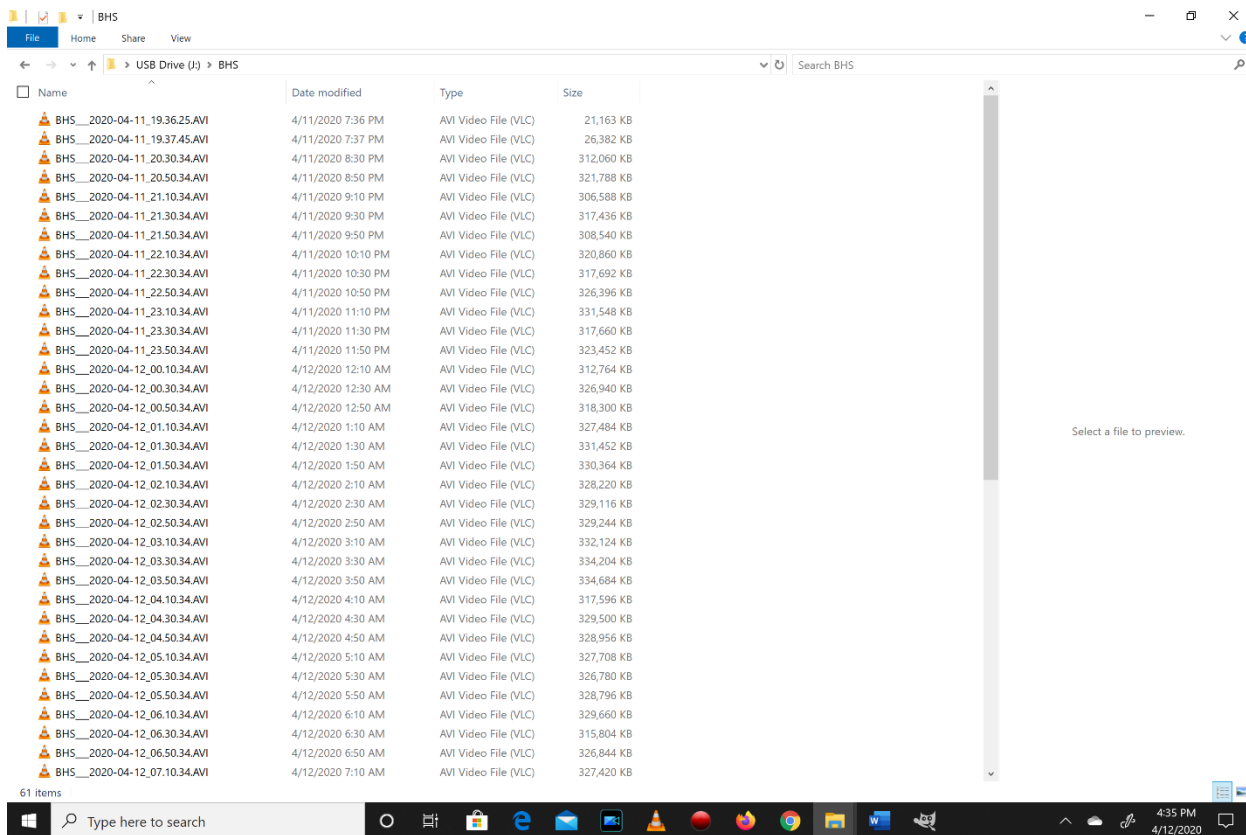

Hold button down. An orange light will come on, continue to hold until light goes off.

View Surveillance:

Plug Camera into computer to view files. A folder labeled “BHS” on a removable drive will be available. All video files will be located inside the folder.
